

Queensland Paediatric Flowchart and Medications

Emergency

Haemophilia – Emergency management in children – Flowchart

* Includes children with moderate or severe Haemophilia A or B and Type 3 von Willebrand disease

**Children under the care of the Haemophilia Team, Queensland Children's Hospital are registered to the Australian Bleeding Disorder Register (ABDR). Carers are given a Treatment Card which outlines the recommended care for major and minor bleeding episodes for their child. Families are encouraged to share this with emergency staff on presentation.

Emergency Treatment Products

There are different products available to treat bleeds. The availability and locations of these products may differ from site to site.

☎ Seek advice from the Queensland Haematology Service via CATCH on 13 CATCH (13 22 82)

☎ Onsite assistance with airway may include ICU/ENT /Anaesthetics. Call Retrieval Services Queensland (RSQ) on 1300 799 127 if no paediatric critical care facility on site
