

# Share information openly and honestly so families can make informed decisions

It is important that you know about these options and opportunities

Being well informed will help us make decisions that suit our child and family

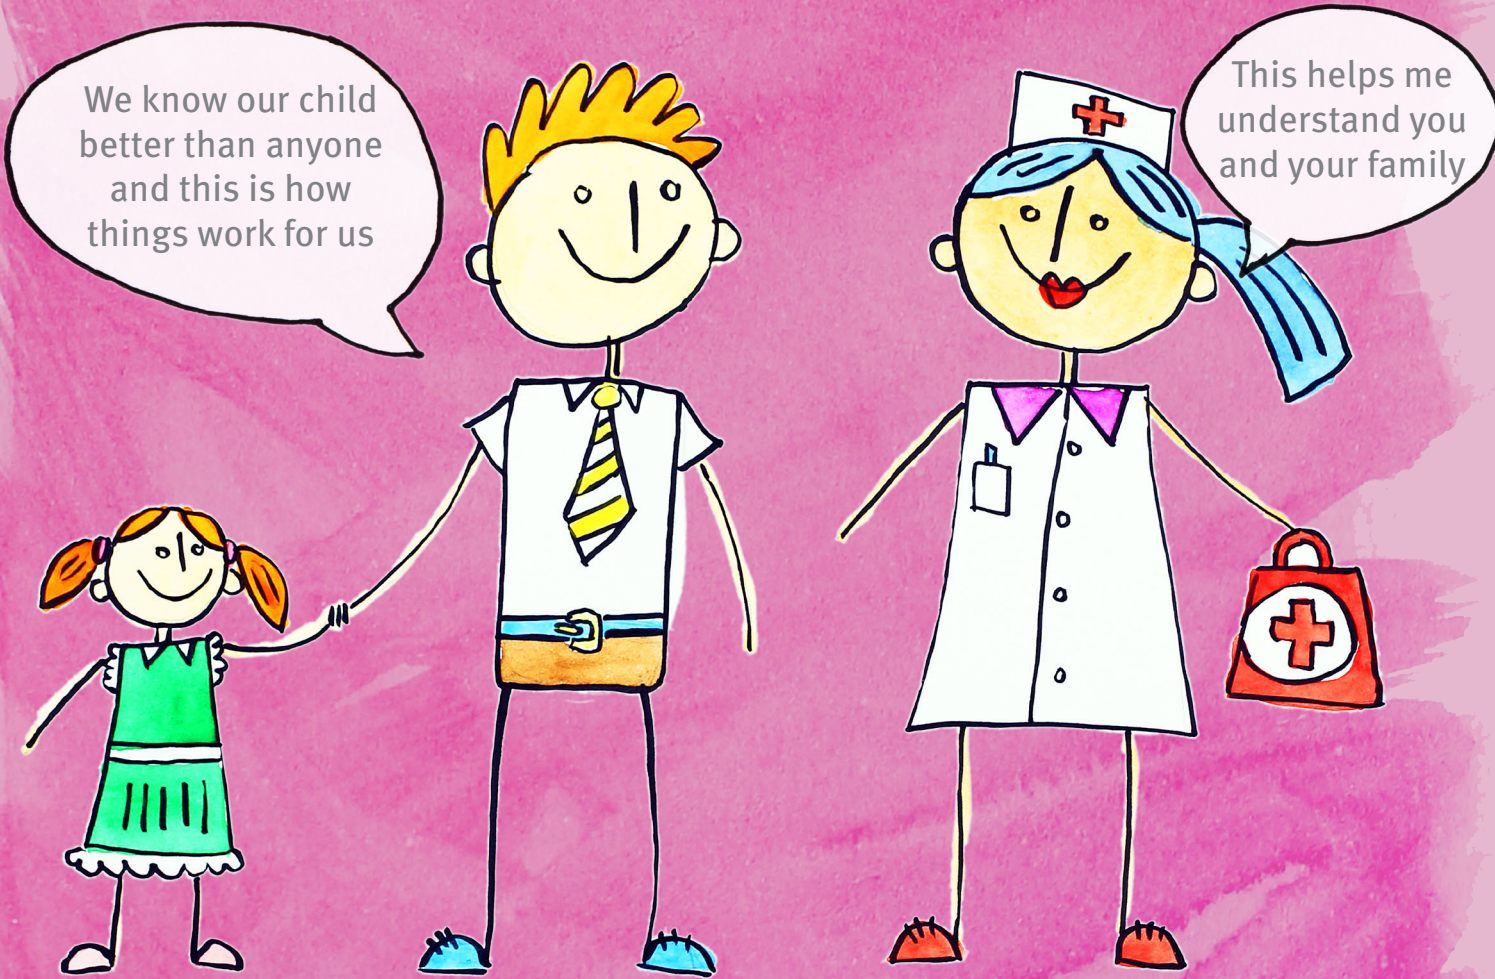

**We place children and families at the heart of everything we do**

[www.childrens.health.qld.gov.au/health-professionals/qcycn/](http://www.childrens.health.qld.gov.au/health-professionals/qcycn/)

# Families are:

- The constant in their child's life
- Experts about their child
- Different from other families

We know our child better than anyone and this is how things work for us

This helps me understand you and your family

**We place children and families at the heart of everything we do**

# Families and clinicians are partners in a child's care

**We place  
children and families  
at the heart of  
everything we do**

# Every family has strengths. Let's use them!

This is what works  
well for our family...  
and this didn't work  
for us

I understand  
what is special  
about your family

We place  
children and families  
at the heart of  
everything we do
